

Corporate Fact Sheet

Established:	Carticept Medical, Inc. is a privately held medical device company headquartered in the northern Atlanta suburb of Alpharetta, Georgia.
Financing:	Carticept has raised \$43 million to date, from two premier medical device venture capital firms, Domain Associates and New Enterprise Associates and from corporate partner, SonoSite, Inc.
Mission:	Carticept is dedicated to improving the quality of life for patients with osteoarthritis or cartilage damage through the development, manufacturing and marketing of innovative medical devices.
Disease Overview:	An estimated 27 million Americans suffer from osteoarthritis, a chronic degenerative joint disease characterized by the breakdown of joint cartilage. Many people do not respond well to current medical treatments or are not eligible for major surgery such as a total joint replacement.
Cartiva™ Synthetic Cartilage Implant	Cartiva, made from a proprietary biomaterial, was developed to replace worn-out cartilage surfaces. The damaged cartilage is cored out and replaced with Cartiva to provide a smooth, load-bearing joint surface. In use since 2002, Cartiva is cleared for sale in the European Union, Canada and Brazil and has been used in over 2,500 surgeries. Clinical trials are underway to support an application for marketing in the United States.
Navigator™ Delivery System	The Navigator Delivery System is an integrated, computer-controlled, image-guided injection system intended to increase the accuracy, efficiency and safety of musculoskeletal injections such as corticosteroids and anesthetics. The Navigator is cleared for sale in the European Union and in the United States.
SonoSite® Ultrasound Equipment	Carticept Medical is the exclusive distributor of SonoSite ultrasound equipment into the US orthopedic and sports medicine office marketplace. SonoSite is the world leader in hand-carried ultrasound with small, lightweight systems that are expanding its use across the clinical spectrum by cost-effectively bringing high-performance ultrasound to the point of patient care.
